LANGUAGES

- JavaScript
- HTML 5 / CSS
- Java
- Python

FRAMEWORK

- React JS / React native
- Node js / Express js
- Flask

DATABASE

- MySQL
- MongoDB
- PostgreSQL

TOOLS

- VS Code, Git, Figma, Docker, Postman,

OTHER SKILLS

- Basic English (reading technical documents)
- Team collaboration & Scrum workflow
- Strong self-learning ability

PROFILE

Final-year Software Engineering student at Duy Tan University with practical experience in full-stack web development using ReactJS, Node.js, Flask, MongoDB, and MySQL. Experienced in building RESTful APIs, responsive front-end interfaces, and database-driven applications. Interested in modern web technologies and eager to gain real-world experience through a full-time internship as a Full-Stack Web Developer.

EDUCATION

Software Engineering CMU 2022-2026
Duy Tan University
CMU : joint training program between Duy Tan University and Carnegie Mellon University (USA)

WORK EXPERIENCE

AID-RESCUE - Intelligent Emergency Support Web/Mobile App 2025 July - Present
Team of 5 students, Scrum-based development.
React Native, Flask, MongoDB, AWS EC2, AWS S3, Docker, Git, Jira

- Built and maintained RESTful APIs with Flask to support authentication, data management, and core backend functionalities of the web application.
- Designed MongoDB database architecture to efficiently manage user profiles and application data.
- Implemented interactive web features including real-time status updates and notification systems.
- Used Docker to containerize backend services, improving development consistency and deployment reliability.
- Deployed backend services on AWS EC2 and integrated AWS S3 for scalable storage of media assets.
- Worked in an Agile/Scrum development process, collaborating with team members on sprint-based feature delivery.

Todo List Web Application 2025 Apr - 2025 June
ReactJS, Sass, Node.js, MongoDB

- Developed a web-based Todo List application to help users manage and organize daily tasks.
- Built a responsive user interface using ReactJS and styled with Sass (SCSS).
- Implemented CRUD operations to create, display, update, and delete tasks.
- Connected the front-end with backend APIs built using Node.js for task management.
